

# Measured results. Timed to perfection.

clearVISION Insight™ provides accurate and timely notification throughout the process to monitor, collect data and alarm when necessary, to allow for alterations and maximum efficiency.

TIME SENSITIVE

PRECISION INTEGRATION

FLEXIBLE SCALABILITY

clearVISION Insight™ lets you track various quality metrics to boost profitability, including:

- Reduction of scrap product/waste
- Product rework
- Enhance accuracy and decrease material costs by standardizing weight or measure
- Fast track change overs/start-ups with timely feedback
- Adapting to process changes such as quality of raw materials
- Allowing for just-in-time delivery of components

#### Sectors:

- Industrial
- Agricultural

#### Quality Gauges:

- Unit dimensions (diameter, length, width, thickness)
- Part validation or absence
- Colour, weight

#### Examples:

- Bottle filling height, part weight measures
- Ingredient blending, recipe tracking

Operating production lines at optimal efficiencies yields increased profits through trimming manufacturing costs and refining processes that add time and incur waste.
